

Duram 195

Duram 195 is a high performance polyurethane waterproofing paint that has exceptional elongation, strength and adhesion allowing it to withstand abnormal water pressure, structure movement and temperature fluctuation. Duram 195 is a single component polyurethane which reacts with moisture in the air to form a flexible heavy duty, seamless membrane that can be permanently immersed in fresh or salt water, with excellent weather and chemical resistance.

Color : Black

PERMANENT FLEXIBLE POLYURETHANE WATERPROOFING

Product uses:

- Dams, reservoirs, and water features that don't contain drinking water.
- Flat roofs and balconies, roof screws and gutters.
- Below grade retaining walls and basements.
- Bonds to any concrete, masonry, brick, fibre-glass and metal.
