

Rainkote Fibre-Tech

Rainkote Fibre-Tech is a flexible pure acrylic waterproofing paint with a 12-year guarantee that utilizes reinforcing fibre particles to form a thick, strong and flexible waterproof coating. When applied, the paint's fibres overlap to form an effective reinforcement which precludes the need to use a separate membrane. It is water-based, quick and easy to apply, and the pure acrylic formulation lends a higher UV protection factor to exposed surfaces.

Color : Grey and Green

FIBRE REINFORCED PURE ACRYLIC WATERPROOFING

Product uses:

- Waterproof flat roofs, parapets, gutters, porticos and etc.
- Bridge hairline cracks without the need for a reinforcing membrane.
- To cover previously repaired large cracks and gaps, or lap joints or flashings where there may be substantial substrate movement as a maintenance coat for existing other acrylics.

Advantages:

- Bridge hairline cracks without the need for a mesh or membrane.
- UV and water resistant.
- The fibres make it tough, durable and flexible.
- The pure acrylic formulation resists fading and chalking.
- An excellent way to maintain previous waterproofing applications.
- 12-year quality guarantee plan with Guarantee Reference Number.
